

Relationship between Human and Environment

Suwatsan Ragkhanto, Phramaha Suchat Analayo, Prhamaha Prakasit Sirimedho, Komsan Jalearnwong

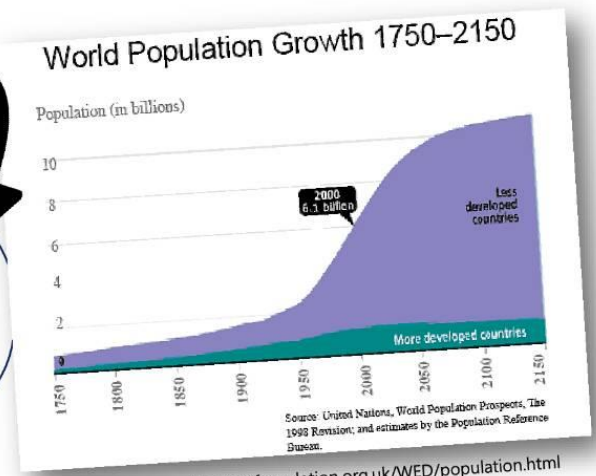

The 8th International Conference on Arts and Cultures in World Heritage : Intangible Cultural to Creative Economy
February 15-17, 2018
Faculty of Liberal Arts Building
Rajamangala University of Technology Suvarnabhumi

Relationship between Human and Environment

- Human life is based on fundamental factors.
- Human beings influence on environmental change.
 - ❑ Three main Components of the environmental Change
 - Population change
 - Human thinking system
 - Human behavior

Those impact on environment and human judgment that **directly effect on persistence or change of the environment** in both local and national levels as well as global level.

Relationship: Human & Environment

- The relationships had begun since human existence in the world.
- Human beings and the environment will depend on each other.
- Several changes of environment due to human or natural will affect all human beings.

Human & Environment

Learning about Natural Resources and the Environment

- ❖ The **global environmental degradation** that arisen from several kinds of development effects lots of economical and social incompleation.
- ❖ Man has been regarded as a **valuable natural resource**. And also man brings out the world's natural resources for his benefits.
- ❖ Learning about **nature and environment around humans was endless** as it is evident that humans depend on and learn the nature and environment for the followings:
 - *Learn to live with the environment.*
 - *Learn to bring nature and things closer to use or improve to make use of living in terms of four factors, and in terms of comfort to live.*
 - *Learn to avoid and prevent environmental problems.*

2

Economic Related with the Environment

- ❖ Humans **have always lived with the environment** for long period.
- ❖ Humans **have produced household goods and expand production** as a natural material industry.
- ❖ The **environment is the consumption goods** that the resources are to support receptacle of wastes and location space as follows:
 - The environment is a **consumer product**.
 - The environment is a **source of resources for production**.
 - The environment is a **supported by waste**.
 - The environment is a **settlement**.

3

Environmental Quality and Life Quality of Human

- ❖ Humans are both **creators and environmental destroyers**.
- ❖ The **problem-solution to restore** the environment and its quality should be solved at the cause of problem.

4

Man Must Rely on Nature and the Environment

- ❖ Nature is **a valuable resource**.
- ❖ Natural forest and natural environment being **abundant will cause rain**.
- ❖ Human beings are part of the natural environment.

Conclusion

- ❖ The relationship between humans and the environment and the action have made change of the world.
- ❖ Humans not only rely to nature and environment but also the nature does.
